CL 50 / 75 Air Cengar Saw

Description

The CL 50 & CL75 Cengar Saw is a powerful air reciprocating saw designed for use in demanding environments where reliability, low weight, easy handling, low noise and vibration levels are important in protecting the operator and providing a high level of productivity. Cengar "Shatterproof" Bi-Metal blades are specially prepared for Use with Cengar saws, to withstand the high operating speeds, and Give maximum cutting life. These saws are most commonly used for cutting metal, timber and glass fibre reinforced plastic.

Technical

Specification

Certification:	ATEX CE II 2G T5 X
Speed:	1200 strokes per minute
Stroke:	45 mm
Air Consumption:	0.168m3/minute
Inlet Connection:	1/4" NPT
Air Pressure:	5-6 Bar
Weight:	2.5 Kgs
Length:	400 mm
Height:	135 mm.
Width:	40.6 mm.
Sound Power Level:	92.4 db.
